Software Engineer with 4+ years of experience building distributed systems in fintech and networking: scaling to millions of users, directly meeting clients to triage bugs, and shipping LLM-powered features.

Skills

Java | Python | Spring Boot | MySQL | REST APIs | Kafka | React | Docker | CI/CD | AI-Assisted Coding

Experience

Software Engineer
Sept 2024 – Oct 2026
Visa
Foster City, California

- Built an offers and coupons distribution platform that scaled to millions of users across 20+ major clients.
- Designed, developed, and maintained Spring Boot APIs for 13+ internal and outward-facing microservices.
- Designed and owned a client-facing configuration service that controlled behavior across all other services.
- Caught AI-generated code bloating that service; redesigned its rules into a top-down flow, fixing client issues.
- Led a team of 5 interns in a coding project that won the company-wide championship over 45 other teams.
- Integrated LLMs to classify merchant categories, extract coupon codes, and rank coupons surfaced to users.
- Triaged client-reported bugs using Splunk, earning recognition from the product team as the go-to engineer.

Software Engineer – Back-end
Sept 2021 – Jan 2024
Tata Consultancy Services (client: Cisco)
San Jose, California

- Developed network management software with Python and XML for networks of 500,000+ devices, with 10+ different device types for Layer 2 and Layer 3.
- Modernized automated test suites for a 4-year-old codebase, increasing test coverage from 73% to 86%.
- Diagnosed and resolved 70+ customer-reported bugs, coordinating with feature owners to assess fixes.

Senior IT Technician
Sept 2019 – July 2021
University of Nevada, Reno
Reno, Nevada

- Trained and led team of 12 IT technicians while handling escalated customer troubleshooting.

IT Technician
Sept 2018 – Sept 2019
University of Nevada, Reno
Reno, Nevada

- Resolved IT issues for staff and students via phone, online chat, and remote sessions.

Education

Stanford University

- Graduate coursework in Economic Analysis — in pursuit of Decision Analysis graduate certificate

Honors B.S. Computer Science and Engineering
University of Nevada, Reno

- GPA of 3.70 / 4.00 | Minor in Business Administration | Minor in Mathematics

Projects

Software Developer and Lead Contact | The SnowPass • Aug 2020 – May 2021

Description: Web application for easy access to live highway traffic camera feeds during icy conditions.

- Designed and programmed website with team of 5 from start to finish.
- Cold-called, networked, and met with state Department of Transportation leaders.

Business Analyst | Steel Bridge Inspection Robot • Aug 2020 – Dec 2020

Description: Patented steel bridge inspection robot to scan for defects or degrading materials.

- Organized meeting with Pennsylvania bridge inspection head and pitched robot usage.
- Analyzed potential business plan and presented plan during mock pitch meeting to investors.
